

Configuring E-Mail on an iPhone

Automatic Provisioning Method

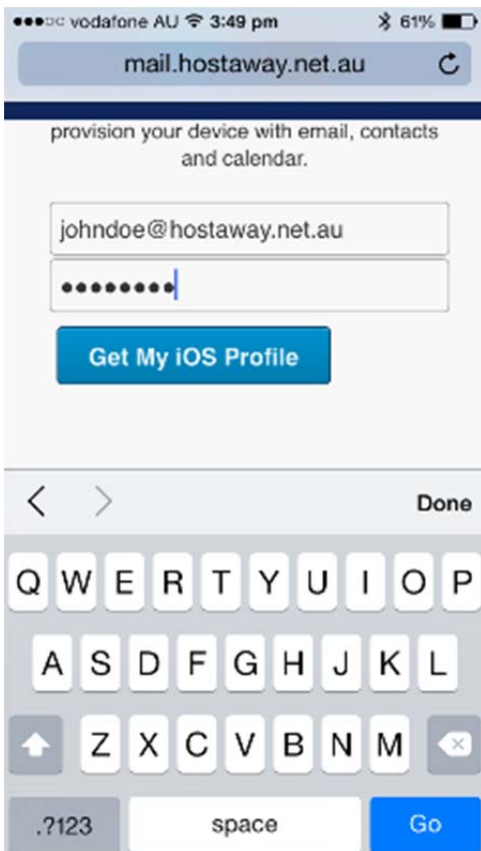

Step 1) From the Home screen open **Safari**

Step 2) Type in **mail.hostaway.net.au** and click *Download the profile*

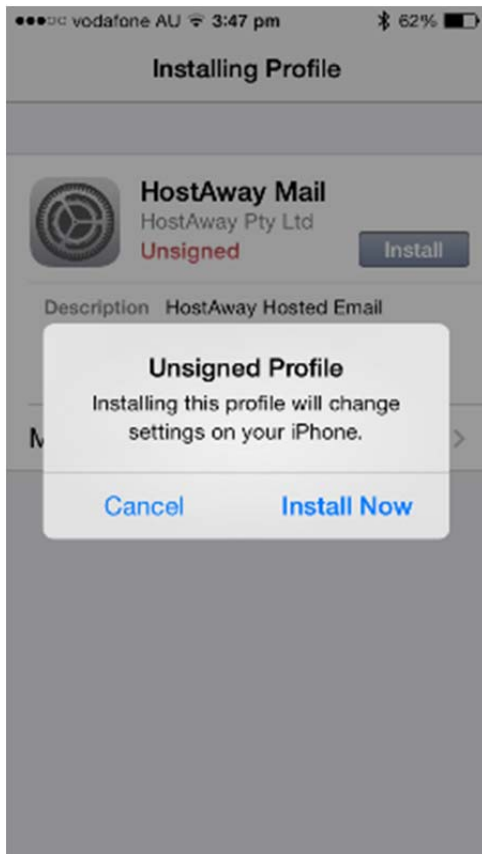

Step 3) Enter your email address, password and click *Get My iOS Profile*

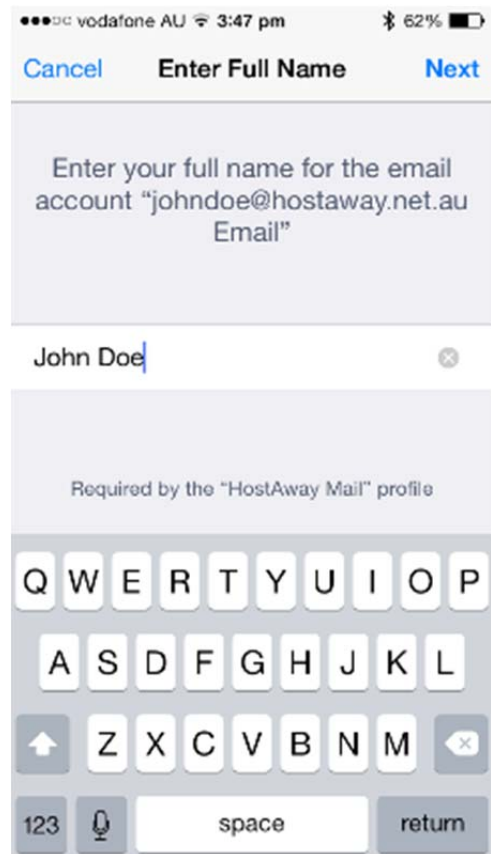

Step 4) Install the profile

Step 5) Click *Install Now*

Step 6) Enter your name and hit *Next*

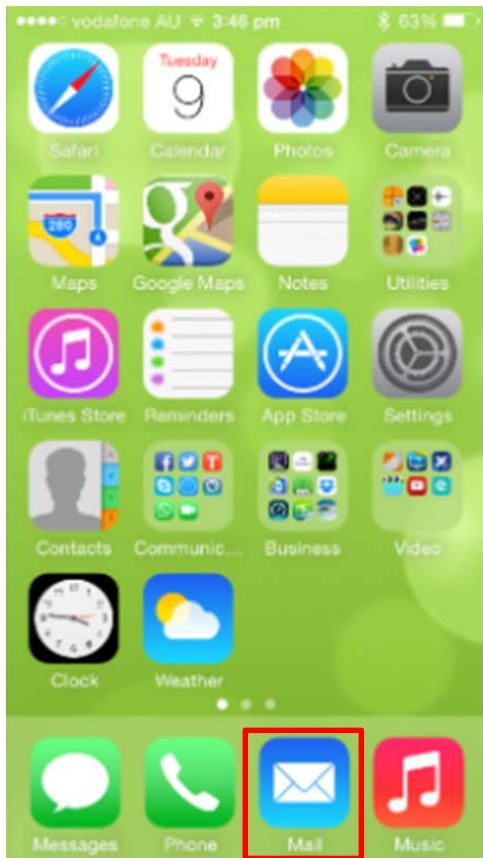

Step 7) Profile is installed, tap *Done*

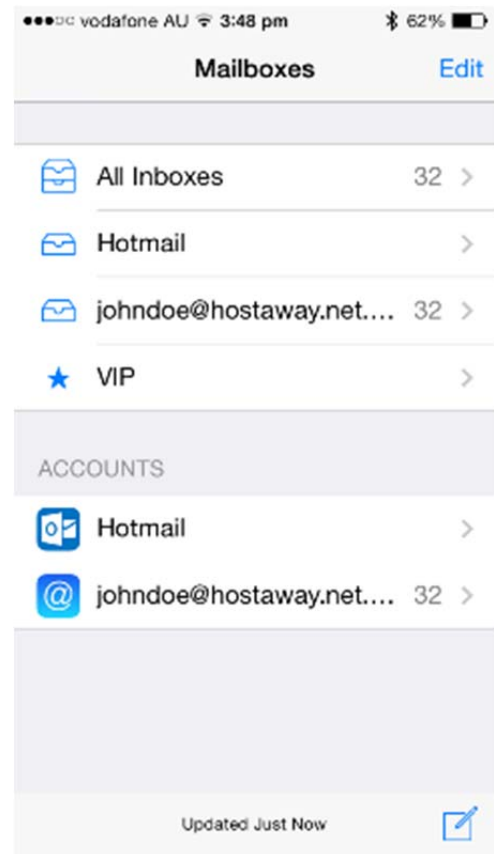

Step 8) You will be returned to Safari

Step 9) Open Mail

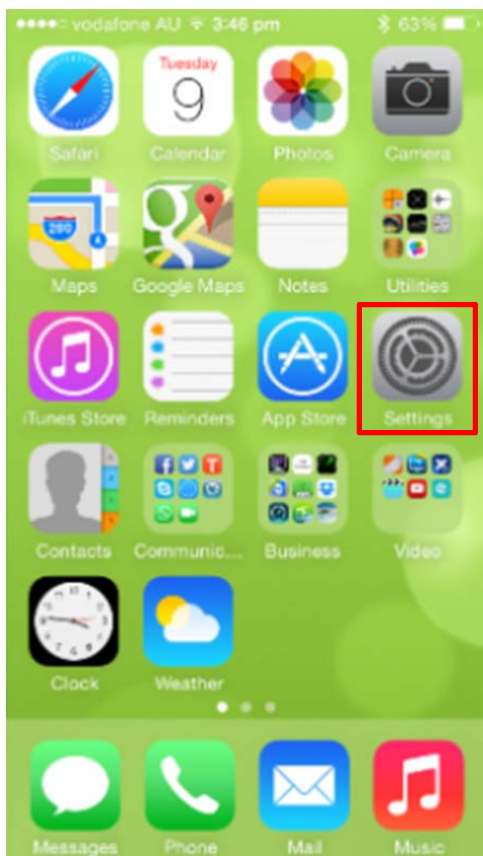

Step 10) You can now view your emails!

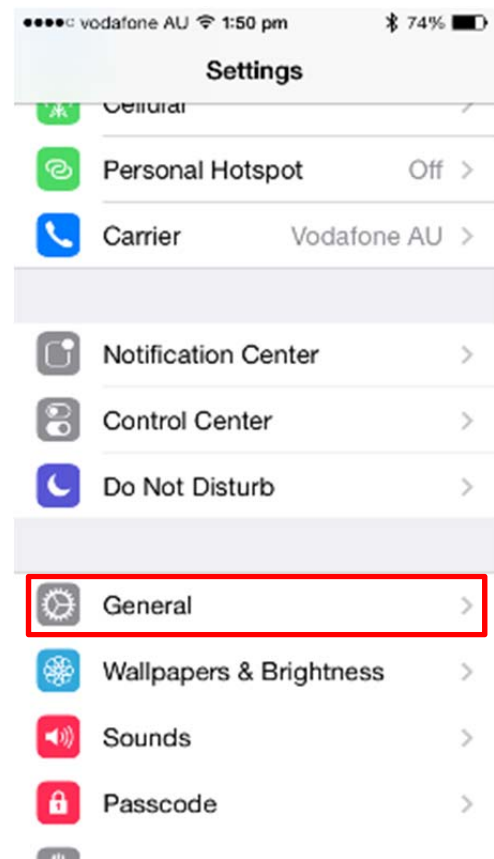

To Remove a Profile

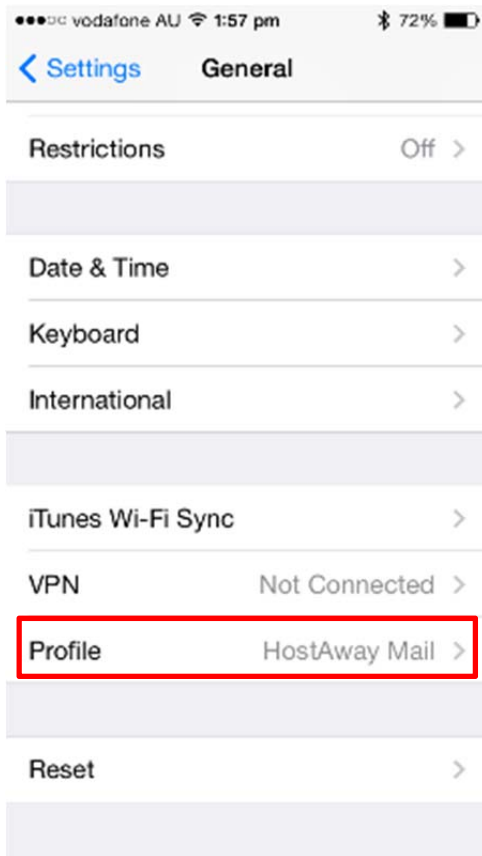

Step 1) Open Settings

Step 2) Select *General*

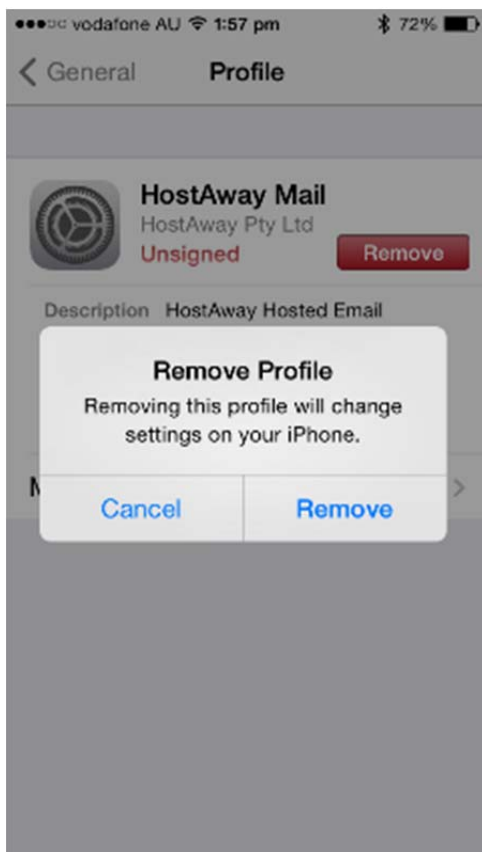

Step 3) Scroll to the bottom and select *Profile*

Step 4) Click *Remove*

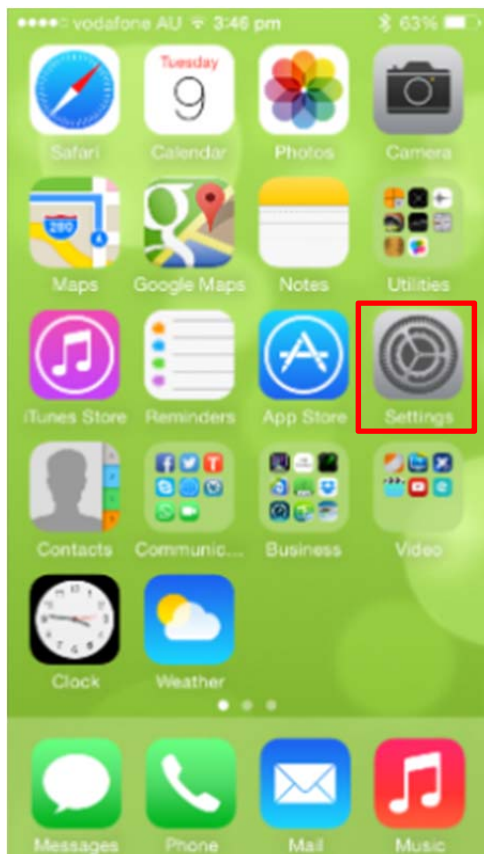

Step 5) Confirm *Remove* and you're done!

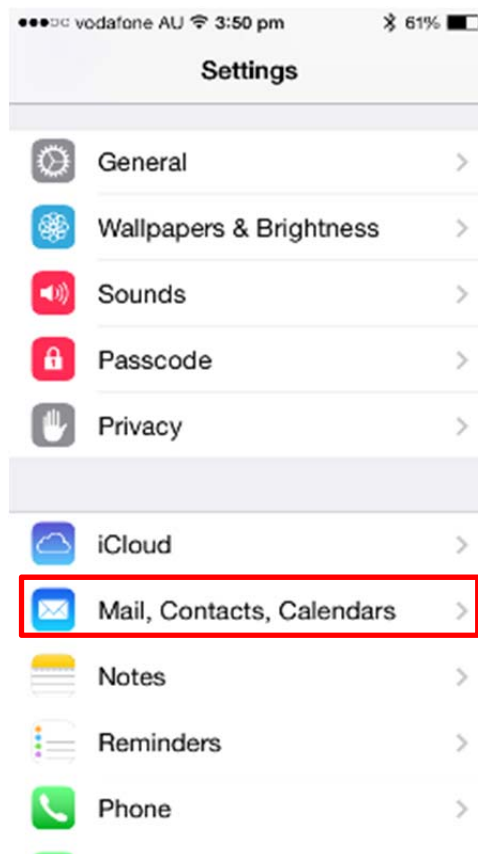

Manual Installation Method

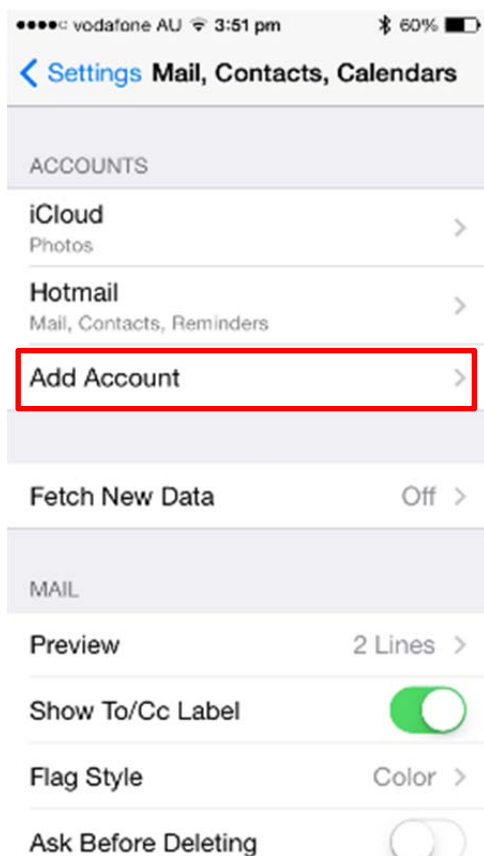

Step 1) Open Settings

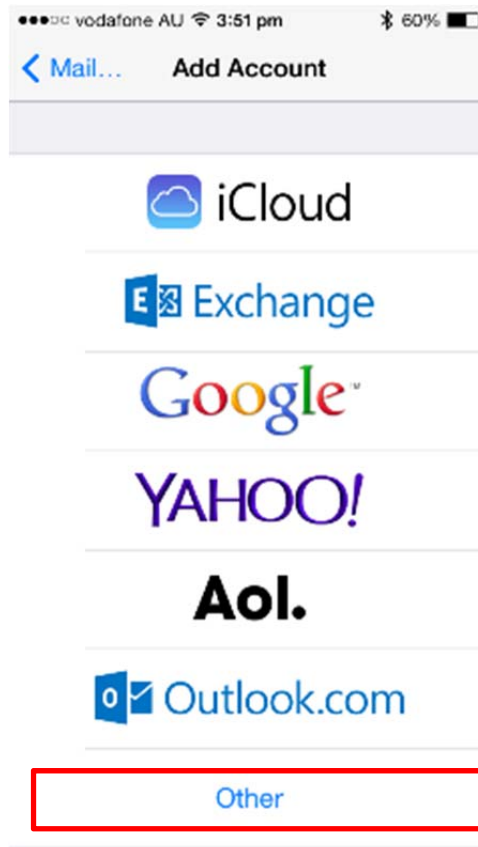

Step 2) Select *Mail, Contacts, Calendars*

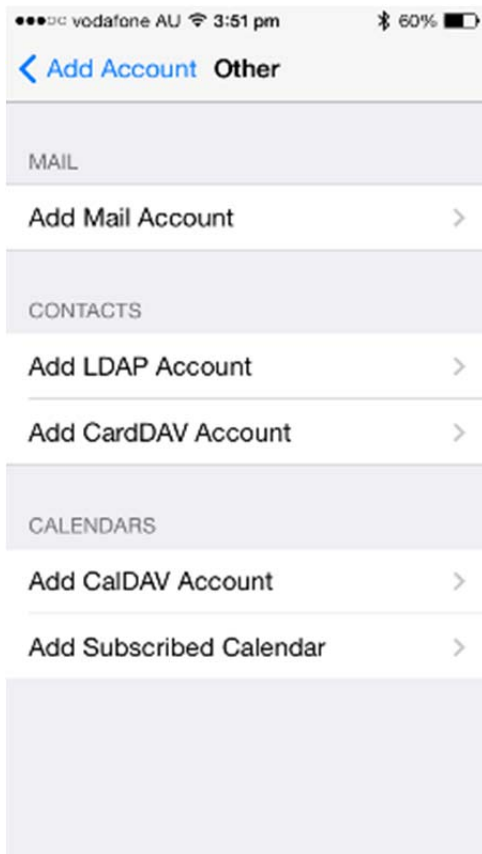

Step 3) Choose *Add Account*

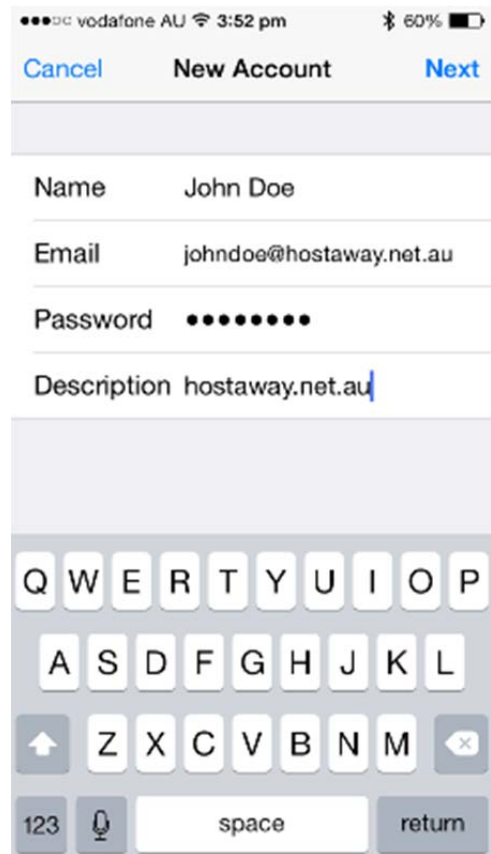

Step 4) Select *Other*

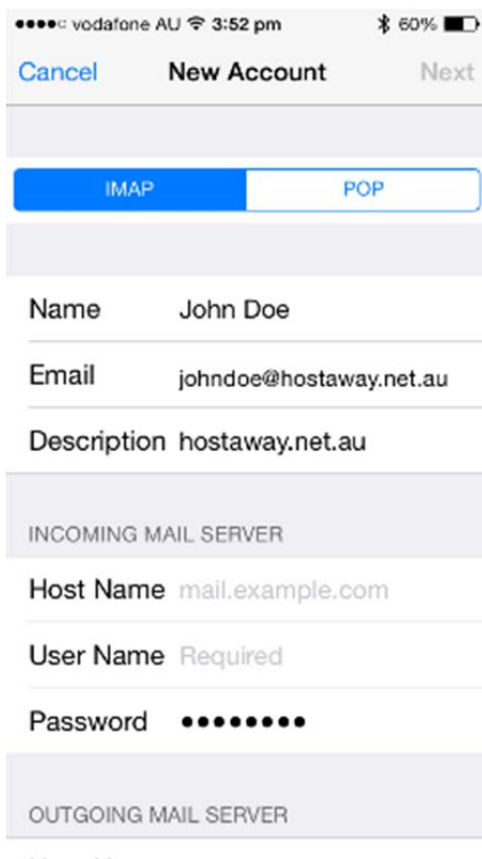

Step 5) Choose *Add Mail Account*

Step 6) Enter your details and hit *Next*

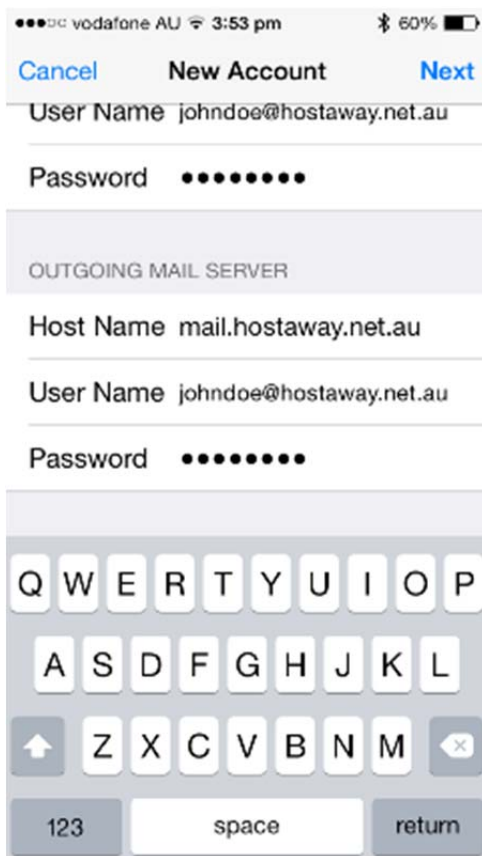

Step 7) Choose [IMAP or POP](#) (most use IMAP)

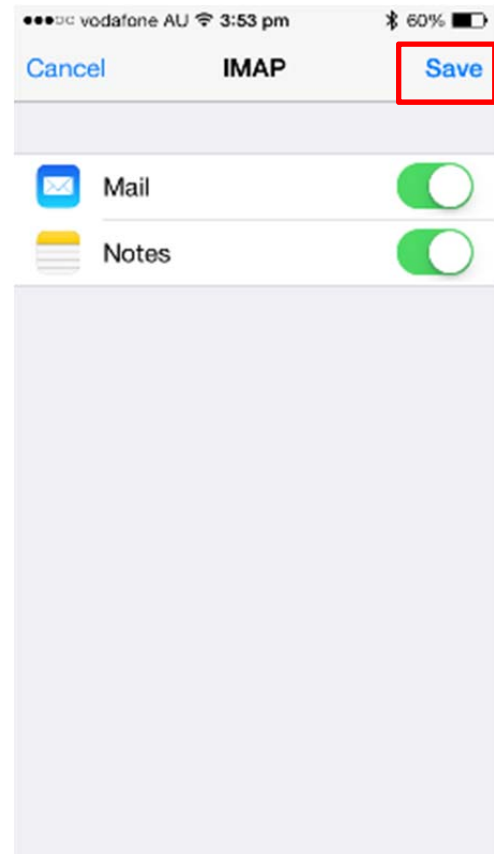

Step 8) Enter the *INCOMING MAIL SERVER*, your email address & password

Step 9) Enter the *OUTGOING MAIL SERVER*, including your email address & password (not optional!) and hit *Next*

Step 10) Select Save and this is now added to your *Accounts*.

Step 11) You can now exit *Settings* and view your Mail !
